

Data must be converted to intelligence, because better intelligence leads to better action.

Reports don't run your business; information does. You already run dozens of reports from your PeopleSoft system, but how mature is your organization in terms of infusing reporting with strategic value? Do you know that from a business intelligence perspective, there are industry best practices for reporting, business processes and KPI/metric alignment across the organization? Is your reporting consistent within the enterprise?

Many companies invest heavily in report creation but do little to ensure the reports convey usable information to the business and end-user communities, especially as the business adapts to changing circumstances. Without intelligence, data points cannot be converted into action.

Reporting 2.0

MIPRO's PeopleSoft Reporting Capability Assessment is a one- to two week high-impact workshop to help you improve your existing PeopleSoft reporting. This workshop will help you move your reporting from basic to industry-leading in terms of value, consistency and best practices, and will help drive user adoption of PeopleSoft through more valuable reporting.

Perhaps most importantly, this workshop provides a great starting point for business intelligence initiatives, as top-grade information enables intelligent business decisions—the real promise of BI.

Timeline

Our PeopleSoft Reporting Capability Assessment can be completed in one to two weeks. During

this time, we provide one business intelligence/reporting expert to review a representative sample of reports and business processes/areas. Prior to the beginning of the on-site session, we work with you remotely to conduct meetings and interviews, as well as review documents and current reports.

Deliverables

Documented findings

- Where does your organization fall in terms of its effective use of reporting and best practices?
- How can reporting be improved to better serve the business and end users?
- What steps are required to move your organization from *basic* to *advanced* to *industry-leading*?

Recommendations

- Short-, medium- and long-term recommendations
- Forward-looking counsel in a business intelligence context
- Prioritized reporting project recommendations based on benefit and feasibility

Real Value Means Real Relationships

MIPRO's ability to form lasting partnerships with our clients rests on two things: the unrivaled passion of PeopleSoft BI and the unparalleled skill and experience of our consultants. The professionals who comprise our team not only possess years of BI and ERP experience, but are recognized as leaders and authorities in their fields. They have earned distinction as a team that gets it right the first time and gets the project done on time and within budget constraints.

BI REPORTING CAPABILITY ASSESSMENT AT A GLANCE

- Understand where your organization stands in terms of industry best practices for reporting
- Improve your existing business processes without changing features/functionality
- Increase user adoption of PeopleSoft through more valuable reporting
- Understand how you can effectively improve your business and reporting within 1-2 weeks
- Validate that your organization is providing the best possible information and reporting designed to support your business to your end-users

Do the Right Thing

Whatever your challenge, you can count on MIPRO to help you do the right thing. Our passion for our clients' success, employing and inspiring the best people in the business, and the PeopleSoft product conditions our every pursuit. And our laser focus on the PeopleSoft suite ensures that our clients get the exacting precision of a specialist, when a generalist simply won't do.
