

## PeopleSoft 9.2: Maximizing your investing

Delivering on Oracle's commitment to the platform, PeopleSoft 9.2 provides an innovative new user experience, expanded product functionally and enhanced lifecycle management. This new release contains over 1,000 new features, functions and enhancements spanning the entire product suite.

### Accelerate your upgrade

Stay current and continue to get more value from your PeopleSoft investment. MIPRO Consulting, an Oracle 9.2 PeopleSoft Early Success Partner, has the tools, templates and proven techniques to get you to PeopleSoft 9.2.

Your journey starts by leveraging MIPRO's five-phase PeopleSoft implementation methodology, MPower; an agile, scalable, focused, efficient, and cost-effective project approach that enables an open and candid dialogue during all stages. The methodology is designed to encourage strong client involvement and promote knowledge transfer every step of the way; a critical element in achieving a successful functional upgrade.

MIPRO's MPower methodology encompasses best practices, templates, and techniques learned from our team's decades of collective experience. The methodology is rooted in both the Project Management Institute's Project Management Body of Knowledge and PeopleSoft's Compass Methodology. Using MPower will allow us to establish a strong project management foundation that will help deliver your project on time, in scope, and at budget while meeting all of the outlined objectives.

### More than just a new version

MIPRO MPower Methodology features a rock-solid project management foundation to help deliver your project on time, in scope and at budget, while meeting or exceeding all of the outlined objectives. Objectives should certainly include timeline and budget, but they can't end there. To truly capture value, they must be much more holistic.

True value is derived from a complete analysis of:

- Did you meet or exceed your core business objectives?
- Were your performance expectations achieved?
- Have you achieved self-sufficiency with the software?
- Was the project delivered within the required timeline?
- Was the project delivered within the defined budget?

If not all of these metrics are accounted for and checked against upon project completion, the project will not maximize the entire spectrum of opportunity.

The proven process includes:

1. Strategic Planning
2. Analysis & Design
3. Development
4. Testing, Testing & More Testing
5. Deployment

Every consulting firm has a process. Not everyone has the passion to prove it succeeds. With MIPRO, our results are predictable, because the process we've built is proven and practical, and is built on a foundation of strategic execution from discovery.

### What we'll do

- Walk your team through the PeopleSoft 9.2 new features and functionality
- Demonstrate new tools capabilities with PeopleTools 8.53
- Execute a 9.2 Upgrade MIPRO BluePrint workshop

- An understanding of the capabilities PeopleTools 8.53
- A translation of the new PeopleTools technical value to business value
- Project charter consisting of success criteria, project objectives, project scope, high level timeline, project organization, risk management plan, issue resolution plan, scope management plan and a project communications plan

### What you'll get:

- Presentation outlining new functionality in 9.2
- Summary highlighting the functionality your organization can leverage

### MIPRO AT A GLANCE

- PeopleSoft 9.2 Early Success Partner
- One of only four vendors invited to PeopleSoft CAB
- 2013 Oracle Open World PeopleSoft 9.2 Panel participant
- Currently engaged in PeopleSoft 9.2 upgrades
- Reputation for customer commitment and "doing the right thing"
- Award winning culture attracting top talent

### Do the Right Thing

Whatever your challenge, you can count on MIPRO to help you do the right thing. Our passion for employing and inspiring the best people in the business, our client's success, and the PeopleSoft product conditions our every pursuit. And our laser focus on the PeopleSoft suite ensures that our clients get the exacting precision of a specialist, when a generalist simply won't do.
